*Reasons for Allowance*

9. The following is an Examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fail to teach, in combination with the other claimed limitations, “creating an event handler that leverages multiple templates for a method node found in the markup language description; registering the event handler; parsing the markup language description and invoking the registered event handler; and automatically generating output code using the invoked event handler in parallel” as recited in independent Claims 1, 16, and 31.

The closest cited prior art, the combination of US 6,925,631 (hereinafter “Golden”), US 6,754,659 (hereinafter “Sarkar”), and US 2003/0158832 (hereinafter “Sijaeie”), teaches a method, a computer system, and a computer program product for processing Extensible Markup Language streams. However, the combination of Golden, Sarkar, and Sijaeie fails to teach “creating an event handler that leverages multiple templates for a method node found in the markup language description; registering the event handler; parsing the markup language description and invoking the registered event handler; and automatically generating output code using the invoked event handler in parallel” as recited in independent Claims 1, 16, and 31.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
